Supplemental Allowance
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Wrkich Reg. # 53,796 on 7/17/06.

The application has been amended as follows:

In **Claims 27, and 41** change "claim 26" on line 1 to --claim 24--.

In **Claim 68** change "claim 67" on line 1 to --claim 66--.

Response to Amendment

1. The amendment received 2/8/06 has been entered in full. Currently claims 1-4,6-22,24-25,27-43,45-47,49-66,68-88 are pending and claims 5,23,26,44,48,67, and 89 have been cancelled.

Response to Arguments

2. Applicant's arguments, see pages 16-18, filed 2/8/06, with respect to the claims have been fully considered and are persuasive. The rejection of all the pending claims has been withdrawn.

Allowable Subject Matter

3. Claims 1-4,6-22,24-25,27-43,45-47,49-66,68-88 are allowed.
4. The following is an examiner's statement of reasons for allowance: As persuasively argued by the Applicant's, none of the prior art of record discloses in combination with the other limitations of the claim, a method of modifying material represented by information signals comprising wherein at least some of the digital representations are modified by making pseudo random changes to the digital representations in accordance with a substantially invertible algorithm, which changes do not substantially change the number of entropy encoded bits, the substantially invertible algorithm being applied by the method of modifying the material to the effect of defining a group of the said representations and transposing pseudo randomly said representations in said group by determining whether one or more transpositions of the representations of the group exist which do not increase the number of entropy encoded bits and the, or one of the, transposed groups or the untransposed group in accordance with a value of a pseudo random number. Thus the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
